

DR PHILIP ANSELL

RESEARCHER & SOFTWARE DEVELOPER

PROFILE

I am an experienced solutions developer with a background as a research scientist. I studied coatings and electrochemical engineering for my doctorate, and then expanded my knowledge into automated software testing and UX design to better apply my knowledge in an increasingly automated world. I value roles that allow me to have an impact on the greater good and enjoy applying my problem solving skills to make a positive impact.

EXPERIENCE

AGILE TEST LEAD

2023 - Present: Swansea University

- Delivered a new SITS bursary function which included close collaboration with senior developers, consultants and over fifty stakeholders from across the business. This project required a large data collection and data wrangling stage.
- Ran quality control and reliability of applications prior to the deployment of an overhauled finance system
- Designed Python code to automate daily repetitive data entry tasks, and used Selenium/ useMango for automating some DevOps pipelines
- Experienced working in a Scrum and DevOps environment.
- Coordinated with customers to identify, troubleshoot, and resolve software-related issues.
- Developing an understanding of Semantic Technologies and LLMs as part of CPD.
- Developed an educational game using C#, .NET in Unity

POSTDOCTORAL TECHNOLOGY TRANSFER RESEARCH FELLOW

2018 - 2023 SPECIFIC and AkzoNobel's Packaging and Coatings R&D Group

- Managed the technical relationship between the university and the AkzoNobel.
- Conducted a collaborative academia-industry research project on smart release corrosion inhibitors, contributing to the sustainable manufacturing of steel.
- Fully proficient in using analytical skills to solve qualitative and quantitative problems over a range of contexts.
- Developed doctoral student project proposals.
- Lab manager for both the wet lab and scanning lab. This included training and maintenance on multi-million pound machinery
- Manufactured and upgraded technical equipment including SKPs and SVET-TLMs (specialised scanning techniques developed in-house at Swansea University).
- Mentored students through their doctorates, providing technical insight, project management and encouragement.
- Created a Thursday thesis writing club to help EngD students with their academic writing.

DR PHILIP ANSELL

RESEARCHER & SOFTWARE DEVELOPER

EDUCATION

BSC (HONS) APPLIED SOFTWARE DEVELOPMENT DEGREE APPRENTICESHIP 2:1

2021 - 2024: Swansea University

- Completed a full time, three-year degree whilst working full time.
- Developed software development skills via academic learning and work-based training.
- Understanding of automation, modelling and AI.
- Programming proficiency: Java, Python, C, PDDL, HTML, CSS, XML, JSON and SQL.
- Studied algorithms, data structure, discrete mathematics.

ENGD IN INTELLIGENT-RELEASE COATINGS FOR CORROSION PROTECTION OF STEEL SURFACES

2013 - 2018: Swansea University

- Developed novel smart release chrome-free corrosion inhibitors for commercially important metals in cooperation with parent company BASF.
- Planned, organised and executed Corrosion Science Symposium 2016 conference
- Supervised three 3rd year undergraduate dissertation projects (1st class achieved by all).
- President of the Swansea University Chemistry Society.

MRES STEEL TECHNOLOGY

2012 - 2013: Swansea University

- Completed a 1-year research project designed to enhance engineering knowledge and skills as well as general skills sought by engineering employers.

BSC (HONS) CHEMISTRY 2.1

2003-2007: Swansea University

PUBLICATIONS

List available on request. Includes one first-name author paper, and writer/ contributor to four more, these were published across 3 different journals.
